

**Reporting Requirements for Recycling Facilities Proposed for Discussion:**

- A. All recycling processing facilities shall meet a minimum of fifty (50%) percent recycling rate annually.
- B. All Construction and Demolition recycling processing facilities shall meet a minimum of twenty (20%) percent recycling rate annually.
- C. At a minimum, an application shall list materials to be accepted; how the materials are to be accepted; how the materials are to be processed for recycling recovery; how they are to be sorted and how they are to be processed for marketing; what type of equipment is to be used for sorting and baling or compacting materials for shipment; what equipment is to be used for storage of materials; what the hours of operation are to be; proposed traffic routes and how material is to be weighed or calculated.
- D. At a minimum, an application shall list quantity of personnel, titles of personnel, qualifications of personnel and duties of personnel.
- E. A construction and demolition recycling facility shall, in addition to the items listed in A-D above, identify the following materials at a minimum in their application including the recycling percentage of all materials to be recovered:
  - 1. Masonry;
  - 2. Asphalt;
  - 3. Asphalt Shingles;
  - 4. Wood;
  - 5. Metal;
  - 6. Appliances; and
  - 7. Gypsum Board.
- F. A paper recycling facility shall, in addition to the items listed in C, D, E and F above, identify the following materials at a minimum in their application including the recycling percentage of all materials to be recovered:
  - 1. Cardboard;
  - 2. Old Newspapers;
  - 3. Mixed Paper;
  - 4. Magazines;
  - 5. Cartons; and
  - 6. Other types of paper fiber.
- G. A commingle container recycling facility shall, in addition to the items listed in C, D, E and F above, identify the following materials at a minimum in their application including the recycling percentage of all materials to be recovered:
  - Glass;
  - Aluminum;
  - Steel;
  - Cartons; and
  - Plastic.
- H. A single stream paper and commingle recycling facility shall, in addition to the items listed in C, D, E and F above, identify the following materials at a minimum in their application including the recycling percentage of all materials to be recovered:

1. Cardboard;
2. Old Newspapers;
3. Mixed Paper;
4. Magazines;
5. Cartons;
6. Other types of paper fiber;
7. Glass;
8. Aluminum;
9. Steel;
- 10 Plastic; and
11. Other types of materials.

- K. A compost recycling facility shall, in addition to the items listed in C, D, E and F above, identify the tier level and their acceptable materials at a minimum in their application including the recycling percentage of all materials to be recovered.
- L. All other recycling and processing facilities shall, in addition to the items listed in C, D, E and F above, identify the materials at a minimum in their application including the recycling percentage of all materials to be recovered.
- M. All recycling and processing facilities shall submit a copy of the State Tonnage Report or their County Recycling Tonnage Report annually to the Solid Waste Division in conformance with the reporting requirements above.

Proposed for discussion:

Recycle Markets:

- Processing Facilities:
  - Material Recovery Facilities (MRF): A facility that separates mixed or commingled like materials into their respective single material. i.e. bottles and cans or construction and demolition materials.
  - Material Processing Facilities (MPF): A facility that disassembles/repairs/separates items into their components. i.e. computers, electronics, vacuum cleaners, lamps, automotive vehicles.
  - Intermediate Processing Facilities (IPF): A facility that processes items into recovered components. i.e. waste oil, tires, batteries.
  - Intermediate Conversion Facilities (ICF): A facility that processes items into raw materials. i.e. plastic into resin or gas, cooking oil into animal feed or biofuel, tires into oil or gas.
- Compost Facilities:
  - Mulch Facilities: i.e. Landscapers, garden nurseries,
  - Compost Facilities: i.e. Tier 1, Tier 2 or Tier 3
  - Anaerobic Digestion Facilities: i.e. Tier 1, Tire 2 or Tier 3
- Redemption Facility or Center
